07 2014

Dear Vidicode Partners...

Dear Partner,

In many countries the vacations have started, but this does not mean there are no new developments at Vidicode. With this newsletter we would like to bring you up to date with the latest information.

Vidicode now part of Ecosoft BV

As we already announced in the special message some time ago Vidicode is now part of Ecosoft BV. Ecosoft BV is fully owned by Rik Eppens (the original founder of Vidicode). This situation does not change our partnership or relation to you. Some administrative changes like the new VAT number and a new bank account number already have been communicated, but please make sure these are entered in your systems.

We will mention our correct details again:

Bank: RABO Vlietstreek Zoetermeer,
PO box 21, 2700 AA Zoetermeer,
The Netherlands
BIC: RABONL2U
IBAN: NL97 RABO 0142 9378 00
VAT Registration : NL819414773B01

The latest news...

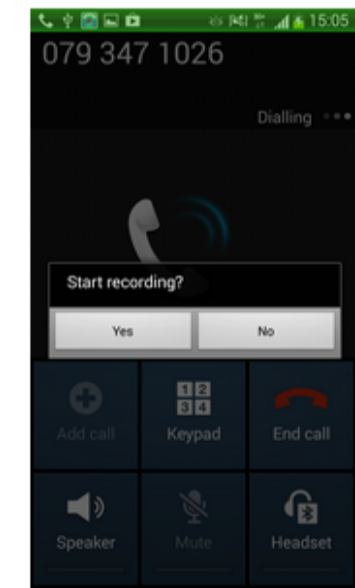

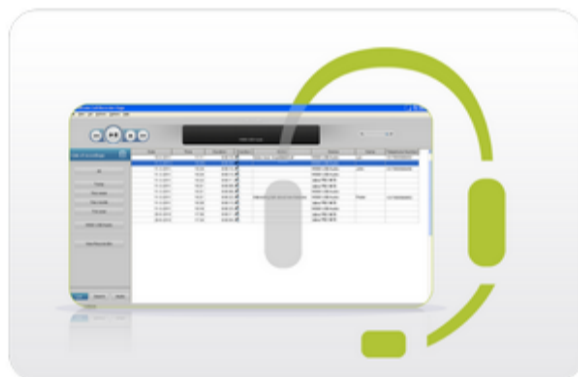

Vidicode website is renewed

We are happy to announce that our new website is online. The new website is faster and will enable us to alter information quicker and easier, keeping you up to date with new developments. This and other newsletters will be made available also on the website. If you have any good ideas to enhance the website further let us know!

Oygo Recording software 2.0 now also for soft-phone use

The Oygo recording software, that was previously only available for a limited number of headsets has been greatly improved. Oygo can now record from virtually any headset / soft-phone combination. This makes the Oygo recording software the most effective and generic solution for recording with a soft-phone. Contact us for further information or a 14 day trial version of this new Oygo version.

Vidicode introduces APRESA Mobile Recording App for Android

- There are two ways to record your mobile phones with APRESA
- 1. Record on your mobile phone and transfer the recording to the APRESA
 - 2. Make a mobile call that passes through the APRESA

The APRESA Recording App can handle both ways. The choice which way to use depends on the make of the mobile phone (most Samsung Smartphones can handle the first method) or the legal requirements (Pass through recording is more direct)

The APRESA Recording App is available now as an annual license for the phone in combination with a special recording license on the APRESA.

[More information about Apresa Mobile Recording](#)

Fax Server UNO upgraded

The popular Single channel Fax Server UNO has been upgraded to the same specifications as the Fax Server IP which will disappear from the portfolio. The Fax Server UNO can now be used by 300 separate users and comes complete with a full software suite that also contains an outlook plug-in to make the interaction between e-mail and fax even simpler.

New pricelist

A new pricelist is available. Some products have been taken out or modified. Please feel free to contact us about this if needed. This pricelist will be mailed to you separately in one of the coming days.

Vacation period

Vidicode will not close during the vacation period time so we are available for all your questions and orders. However in the coming weeks some of the Vidicode staff will be on vacation. This can mean a short delay in response time or delivery time.

The intention is to bring you once a month information about new products, product updates and so on. You can always unsubscribe or change your E-mail address (please see link below this message). If you have any other person in your company who would need to receive this information then please reply to this NewsFlash and send the full contact details. Thank you for reading,

Leo Gareman (Managing Director)
